Celia@solar1.org or 212-505-6050

Free Event! Refreshments provided!
solar1.org/greenfrominsideout

ROOF APPLICATIONS Hear about the economic and quality-of-life implications of four rooftop applications that make sense in NYC: solar thermal technology, photovoltaics, green roofs & white roofs.

6:00 pm

Presentation by Chris Neidl of Solar One

ENERGY EFFICIENCY Find out how to reduce fuel and utility costs while improving resident comfort and building performance. Learn what incentives and financing options are available for your building.

6:45 pm

Presentation by Max Joel of Solar One

RECYCLING Come test your recycling knowledge and hear about new recycling laws and old misconceptions. Learn about other ways to reduce waste, recycle more and help make NYC a little greener.

7:30 pm

Presentation by Christina Salvi of Council on the Environment of NYC

EXHIBITORS Vendors of green products and technologies will be present during the evening to answer all technical questions.

Financial support provided by the US EPA under a grant agreement
